

# **KOLHAN UNIVERSITY, CHAIBASA JHARKHAND**

**Syllabus for FYUGP (Mathematics-MDC)**

As per

**Revised Curriculum and Credit Frame work of NEP- 2020**

To be effective from academic session 2022-26

University Department of Mathematics  
Kolhan University, Chaibasa  
West Singhbhum, Jharkhand-833202

**UNIVERSITY DEPARTMENT OF MATHEMATICS  
KOLHAN UNIVERSITY, CHAIBASA**

**Four-Year under Graduate Programme (FYUGP)**

As per Provisions of NEP-2020 to be implemented from Academic Year 2022-23

**COMPOSITION OF BOARD OF STUDIES**

1. **Dr. Bijay Kumar Sinha**  
Head, University Department of Mathematics,  
Kolhan University Chaibasa

2. **Dr. Md. Moiz. Ashraf**  
Head, P.G. Department of Mathematics  
Karim City, College, Jamshedpur

3. **Dr. P. C. Banerjee**  
Assistant Professor,  
P.G. Department of Mathematics  
Karim City, College, Jamshedpur

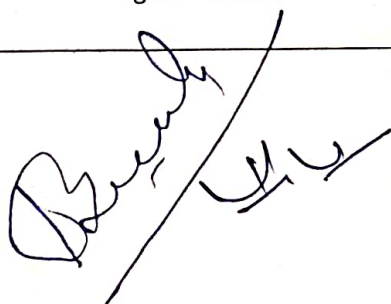

4. **Mr. Mahendra Kumar Rana**  
Assistant Professor,  
University Department of Mathematics,  
Kolhan University Chaibasa

**Dr. Bijay Kumar Sinha**  
(Chairman & Head)  
University Department of Mathematics,  
Kolhan University, Chaibasa.

Index				
Semester	Paper	Code	Course Title	Credit
I	Multi-Disciplinary /Introductory Regular Course	MDC/IRC	Introduction Course in Mathematics	3

Program: <b>Certificate</b> Class: <b>UG</b>	Year: <b>First</b>	Semester: <b>I</b>
Subject: <b>Mathematics</b>		
Course Code: <b>MDC/IRC</b>	Course Title: <b>Multi – Disciplinary/Introductory Regular Course</b>	
<b>Course Learning Outcomes:</b> This course will enable the students to: a) Construct and evaluate formal proofs using various proof strategies, including mathematical induction, to demonstrate the validity of logical arguments. b) Analyze and apply the properties of relations and functions, including reflexivity, symmetry, transitivity, injectivity, surjectivity, and bijectivity, to solve mathematical problems in various contexts. c) Analyze and apply the concepts of modular arithmetic and congruence relations to solve problems related to divisibility, linear congruences, and arithmetic functions, as well as understand and apply advanced topics such as the Chinese remainder theorem, Fermat's little theorem, and Wilson's theorem to solve more complex problems. d) Analyze and apply concepts related to the real number system, including its field and order structures, bounded sets, supremum and infimum of sets, and completeness property. e) Analyze and determine the convergence or divergence of sequences and series using various techniques, including the comparison test and advanced tests such as the ratio test and root test.		
Credit: <b>3 (Theory)</b>	<b>Compulsory</b>	
Full Marks: <b>75</b>	Time: <b>3 Hours</b>	
<b>Unit</b>	<b>Content</b>	<b>Hours</b>
<b>I</b>	<b>Logic:</b> Statement, Truth table, Quantifiers, Proof strategies, Mathematical induction.	<b>8 h</b>
<b>II</b>	<b>Sets and functions and relations:</b> Reflexive, Symmetric, Asymmetric and Transitive relations, Injective, Surjective and Bijective functions.	<b>10 h</b>
<b>III</b>	<b>Theory of numbers:</b> Modular arithmetic, Divisibility, Congruence relation, Linear congruence and Chinese remainder theorem, Fermat's little theorem, Wilson's theorem, Arithmetic functions and Set of residue classes modulo $n$ : ' $\mathbb{Z}_n$ '.	<b>8 h</b>
<b>IV</b>	<b>Real number system:</b> Field and Order structure, Bounded sets, Supremum and Infimum of sets, Completeness property of set of Real number $\mathbb{R}$ .	<b>8 h</b>
<b>V</b>	<b>Sequences and series:</b> Limit of a sequence, Convergent and non-convergent sequence, Limit points of a sequence, Positive term series, convergent and divergent series, Comparison test of positive term series.	<b>11 h</b>
<b>*Remarks -: No Internal Exam</b>		
<b>Books Recommended:</b> 1. R.G. Bartle and D. R. Sherbert (2002). Introduction to Real Analysis (3rd Edition), John Wiley and Sons (Asia) Pvt. Ltd., Singapore. 2. R. K. Dwivedi (2019). Real Analysis, 1 st Ed., Pragati Prakashan. 3. S.C. Mallik and S. Arora-Mathematical Analysis, New Age International Publications. 4. F. Cajori (1904). An Introduction to The Modern Theory of Equations. The Macmillan Company. 5. Kolman, Busby and Ross (2002). Discrete Mathematical Structure, 4 th Ed., Pearson Education Asia. 6. V. Rajaraman (1993). Computer oriented numerical methods, Prentice Hall India.

FYUGP SEMESTER -III UNDER NEP - 2020

FYUGP SEMESTER -III UNDER NEP - 2020		
Program:Diploma Class: UG	Year:Second	Semester:III
Subject:Skill Enhancement Course		
CourseCode:SEC-III	CourseTitle: Mathematical & Computational Thinking and Analysis	
<b>Course Learning Outcomes:</b> This course will enable the students to: a) Know the concepts in logic. Develop the capabilities of logical reasoning. b) Understand the number system and will be able to solve problems related to ratio, proportion, simple & compound interests, c) Understand the properties of AP, GP & HP and apply their properties in problem solving d) Understand the elementary ideas of statistical data analysis using graphs and statistical measurement of central tendencies & the deviations from it. e) Understand the basic idea of probability.		
Credit:3(Theory)	Compulsory	
Full Marks:75	Time: 3 Hours	
Unit	Content	Hours
I	<b>Logic:</b> Introduction, Statement, Truth value of a statement, Negation of a statement, Compound or mixed statements. Logical Connectives and Tautologies, Implications / Conditional statements, Converse statement, Positive statement, Validating statement.	10 h
II	<b>Elementary Arithmetic:</b> <b>Real Numbers:</b> Different types of numbers (natural, whole, integers, rational) and their properties. Fundamental Theorem of Arithmetic, LCM & HCF of two real numbers, Rational & Irrational numbers, Ratio, Proportion. Advanced Arithmetic: Percentages, Simple Interest, Compound Interest,	10h
III	<b>Progression:</b> Elementary idea of A.P., G.P., and H.P., their means & related problems <b>Quadratic Equations:</b> Definition, nature of roots, & its application problems.	10h
IV	<b>Statistics and Probability:</b> Diagrammatic presentation of data: Bar Graphs, Histograms of uniform width, and of varying widths, Frequency Polygon. Measures of Central Tendency: Mean, Median, Mode, Mean Deviation, Standard Deviation, classical definition of probability, simple problems on finding the probability of an event.	15h
<b>Books Recommended:</b> 1. "Mathematical and Computational Thinking and Analysis": Dr R. K. Tiwary, Dr. Y. K. Mishra & Dr. B. N. Gupta. 2. "Arithmetic": Lalji Prasad. Students' Friends		
<b>Reference Book:</b> 1. NCERT for class IX & X
