- D. Differential selection of subjects
- E. Experimental mortality

Choose the correct answer from the options given below:

- (A) B, D and E only
- (B) A, B and C only
- (C) B, C and D only

(D) C, D and E only

13.) Match List I with List II

List I

Research Steps

- A. Research problem definition
- B. Formulation of research hypothesis
- C. Design of research
- D. Data Analysis

List II

Characteristics

- I. Appropriateness of techniques and their application
- II. Development of a conceptual framework which is in accord with hypothesis of research
- III. Defining the variables to be related in unambiguous terms
- IV. Academic and social value of the research question to be weighed

Choose the correct answer from the options given below:

- (A) A - III, B - IV, C - I, D - II
- (B) A - IV, B - III, C - II, D - I
- (C) A - I, B - II, C - III, D - IV
- (D) A - II, B - I, C - IV, D - III

14.) Given below are two statements :

Statement I: Scientific research is systematic, controlled, empirical and critical investigation of hypothetical propositions.

Statement II: Population of research need not be defined in qualitative and quantitative researches.

In light of the above statements, choose the correct answer from the options given below

- (A) Both Statement I and Statement II are true
- (B) Both Statement I and Statement II are false
- (C) Statement I is true but Statement II is false
- (D) Statement I is false but Statement II is true

15.) Given below are two statements: One is labelled as Assertion A and the other is labelled as Reason R:

Assertion A: Actual settings are the direct source of data and the researcher is the key instrument in qualitative research.

Reason R : The purpose underlying qualitative researches is relatively more directed at depiction of reality rather than arriving at context free generalizations.

In light of the above statements, choose the correct answer from the options given below

- (A) Both A and R are true and R is the correct explanation of A
- (B) Both A and R are true but R is NOT the correct explanation of A
- (C) A is true but R is false
- (D) A is false but R is true

The need for continuing and reinforcing value oriented curriculum at the post graduate level and level of professional studies may be considered even more important. Most of the students trained at these levels are likely to become leaders of business and industry, technocrats, leaders of thought, teachers and educationists, research workers, professionals, political leaders and social workers etc. besides playing their normal roles as citizens and family members like all other people. It appears that most of them at the time of leaving the college after 3-6 years of study, may have a poor idea of the values of freedom and human dignity, the value of food, security and health care for millions of poor and disadvantaged people, the importance of correct public policies for managing societies and solving several problems, the importance of proper human relations and personal life styles, etc. A good number of them, however are now getting opportunities to acquire modern scientific and technical knowledge of high standards particularly in some of our institutions of excellence, comparable to the best institutions in the developed countries. But the problem of inadequate access to this kind of modern knowledge for the poor and disadvantaged groups in our society constitutes a serious social and moral issue.

Curricular reform and reconstruction on proper lines should be the active concern of educationists and educational planners, because as pointed out in national policy document 1986, it can be a forceful tool for the cultivation of social and moral values. In our culturally plural societies education should foster universal and eternal values, oriented towards the unity and integration of our people. Such value education should eliminate obscurantism religious fanaticism, violence superstition and fatalism.

In higher education, in the context of promoting strong value orientation, which of the following statement holds true?

- (A) Provide opportunities to students to acquire scientific knowledge of high standards.
- (B) A Policy for development of values may be prepared.
- (C) Offer courses related to inter disciplinary contemporary socio-economic problems.
- (D) The universities should aim to enrich technological dimensions.

50.) Read the passage carefully and answer the question that follow

The need for continuing and reinforcing value oriented curriculum at the post graduate level and level of professional studies may be considered even more important. Most of the students trained at these levels are likely to become leaders of business and industry, technocrats, leaders of thought, teachers and educationists, research workers, professionals, political leaders and social workers etc. besides playing their normal roles as citizens and family members like all other people. It appears that most of them at the time of leaving the college after 3-6 years of study, may have a poor idea of the values of freedom and human dignity, the value of food, security and health care for millions of poor and disadvantaged people, the importance of correct public policies for managing societies and solving several problems, the importance of proper human relations and personal life styles, etc. A good number of them, however are now getting opportunities to acquire modern scientific and technical knowledge of high standards particularly in some of our institutions of excellence, comparable to the best institutions in the developed countries. But the problem of inadequate access to this kind of modern knowledge for the poor and disadvantaged groups in our society constitutes a serious social and moral issue.

Curricular reform and reconstruction on proper lines should be the active concern of educationists and educational planners, because as pointed out in national policy document 1986, it can be a forceful tool for the cultivation of social and moral values. In our culturally plural societies education should foster universal and eternal values, oriented towards the unity and integration of our people. Such value education should eliminate obscurantism religious fanaticism, violence superstition and fatalism.

In order to cultivate values. the higher education system should concentrate on

- (A) Plugging pedagogical deficiencies
- (B) Integrating technology
- (C) Integrating technology with pedagogy
- (D) Curricular reforms
