Question 12

Read the passage given below and answer the questions that follow.

The city of Mumbai is built on seven islands. There was a time when streams flowed across different parts of the city, separating one island from another. There was an abundance of green fields and marshlands. The beaches were clean and beautiful. Over the years, due to an increase in population and scarcity of land these areas have been used for constructing roads and buildings. This has affected the city's ecology and biodiversity and has led to many environmental problems.

- (i) "Over the years, due to an increase in population and scarcity of land these areas have been used for constructing roads and buildings." Which aspect of development does this refer to?

[1]
